

Hedgerow Software For Community Engagement

Hedgerow Software online violation management system improves communication, productivity, and reduces service costs for agencies, operators, and citizens.

Hedgehog Portal

Bring e-government full circle and seamlessly integrate with Hedgehog database. Web-based data sharing offers online services to regulated businesses. Less paper, more revenue.

Hedgehog Disclosure Site

Provide better public transparency to citizens and operators. Public-facing website allows facility searches on a map, view latest inspection and sample results, permit restrictions, enforcement actions and closures.

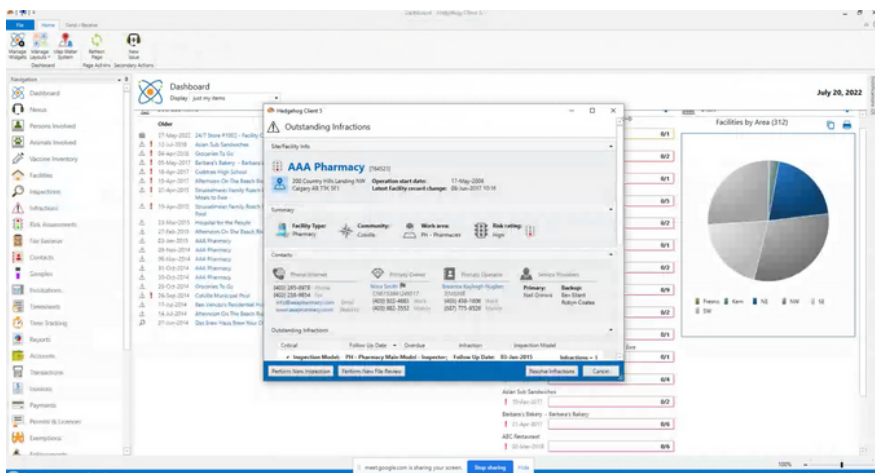

Hedgehog Platform

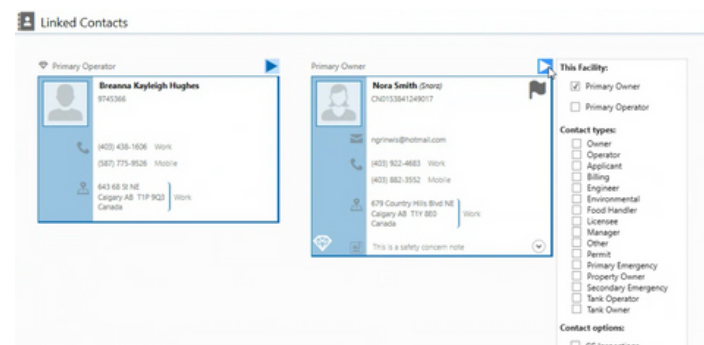

Drive productivity with a set of applications built on Microsoft Azure for inspection workflows, reporting, analysis, and community engagement.

Portal enables two way communications for any workflow

Interactive, online communication tools for inspectors, operators, and citizens

Benefits

Increase Productivity

Interactive online communication tools enable better engagement between inspectors, operators, and citizens.

Flexible

Adopt a solution that grows with your agency and eliminates costly custom programming with superior configuration tools.

Improve Service Delivery

Provide online services such as permit renewals, application submissions, and fee payments to regulated businesses.

Configurable

Setup workflows how you want them. Puts you in control of the tools, configuration and data to succeed with less dependence on IT.

Save Time

Eliminate the need for inspector, operator, and citizen travel for minor tasks that can be completed online in minutes.

Interoperable

Hedgehog & Hedgehog Portal's financial integrations directly link via API to the payment system and at the point of sale, transports the public user to the specific payment provider system.

Reduce Costs

Online communication tools reduce the need for citizens and business operators to call agency support staff.

Multilingual

Powerful multilingual capability for inspectors and communities. Manage EH workflows in English, French, and Spanish.

Hedgerow Software is the only 100% purpose-built EHS Technology for environmental health agencies across North America. Built by experts, for experts, Hedgerow provides technology and professional services for government agencies exceeding client expectations since 1993.
