Hedgerow

Hedgehog Application Suite
Award-winning EHS Technology for Environmental Health Agencies

The only 100% purpose-built EHS technology for government agencies. Increase field inspector productivity, managerial insights, office staff efficiency, and community engagement for data-driven environmental health programs.

Hedgehog Platform
Drive productivity with a set of applications built on Microsoft Azure for inspection workflows, reporting, analysis, and community engagement.

Hedgehog Portal
Bring e-government full circle and seamlessly integrate with Hedgehog database. Web-based data sharing offers online services to regulated businesses. Less paper, more revenue.
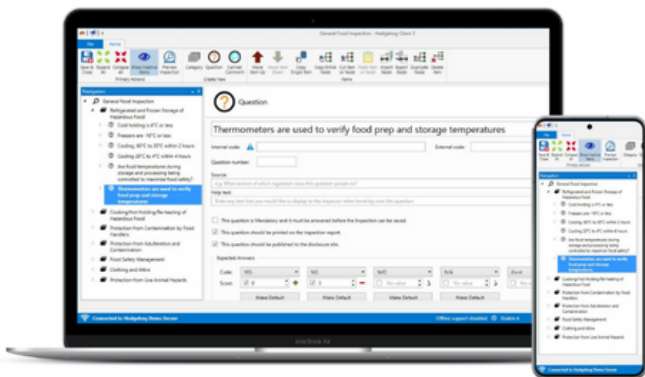

Hedgehog Technology
Sreamline programs and regulatory processes in a single database. Developed on the Microsoft .NET Framework for an agency-hosted environment or a Hedgerow cloud-based environment.

Hedgehog Community Disclosure
Provide better public transparency to community members. Public-facing website allows searches for facilities on a map and viewing latest inspection results, enforcement actions and closures.

Streamline Regulatory Processes for Data-driven EH

- Inspections
- Permits
- Time & Activity
- Complaints
- Reports
- Samples
- Invoices
- Risk Assessements

Benefits

✓ **Increase Productivity**

Offer field users real-time data, electronic inspection forms, and automated inspection scheduling with offline capability.

✓ **Improve Service Delivery**

Provide online services such as permit renewals, application submissions, and fee payments to regulated businesses.

✓ **Easy to Use**

Utilize Microsoft's popular ribbon user interface design so it's easy for all employees to be productive, right away.

✓ **Affordable**

Templatized approach enables Hedgerow tools and professional services to be deployed more cost effectively.

✓ **Flexible**

Adopt a solution that grows with your agency and eliminates costly custom programming with superior configuration tools.

✓ **Configurable**

Setup workflows how you want them. Puts you in control of the tools, configuration and data to succeed with less dependence on IT.

✓ **Interoperable**

Common hooks to 3rd party tools out of the box with robust APIs makes county-level integrations to accounting, building/planning, and GIS systems simple.

✓ **Multilingual**

Powerful multilingual capability for inspectors and communities. Manage EH workflows in English, French, and Spanish.

Hedgerow Software is the only 100% purpose-built EHS Technology for environmental health agencies across North America. Built by experts, for experts, Hedgerow provides technology and professional services for government agencies exceeding client expectations since 1993.
